

# RB-25/CB *TapGear* Ver-5.05

## New version announcement

RB systems Ltd is proud to present the new version for the RB-25/CB *TapGear*.

### What's new about Ver – 5.05 ?

In addition to the previous RB-25 versions' powerful software and flexible programmable features the new RB-25/CB *TapGear* Ver-5.05 contains the following:

- Brake Pedal Switch position information reads directly from the CanBus data.  
No need to connect vehicles' Brake Pedal Switch to RB-25/CB unit; Saves time in installation and is safer to use.
- Brake pedal position output for auxiliary usage;  
The RB-25/CB Relay #2 (Blue/Red pin #15, Blue pin #16 and Blue/Black pin #4) is the Brake pedal press relay output.  
R2 = close: while Brake pedal pressed AND IGN = ON  
R2 = open: while Brake pedal not pressed OR IGN = OFF  
Maximum current 10A
- Supporting all Volkswagen/Audi/Skoda DSG gearbox
- Supporting Mercedes Vito/Sprinter
- Low power consumption (for vehicle battery saving)

A new version of RB-25/CB *TapGear* Installation Manual is available, to receive free copy [click here](#).

Note: Programming instructions remain unchanged.

The RB-25/CB *TapGear* is an "Electronic Gear Shift & Tiptronic Control system" especially designed for Volkswagen/Audi/Skoda DSG gearbox and for Mercedes Vito minivan using high-speed CanBus connection technology.

RB systems team continuously works hard in order to improve our products and help installers have easier installations, advanced features and better product reliability.
